

Accessibility Assistance

BEK Communications provides access to products and services to requesting customers with visual and audio impairments for easier digital content engagement, including but not limited to:

- a) Large-Button Remotes. BEK can provide Remote Controls with larger buttons upon request. They are provided at no additional cost and can easily be swapped for current TV remotes.
- b) Bill Reading. If Customer prefers to pay-bill-by-phone, a Customer Advocate will read the Customer's bill over the phone, upon request.
- c) Directory Assistance. We can help you find and dial phone numbers.
- d) Closed Captioning. BEK-provided remotes include a mechanism reasonably comparable to a button, key or icon for easy activation of embedded closed captioning functions. Once activated, Closed Captioning will always be turned on. Loss of power may or may not require a reset.
- e) TTY Dialing. BEK's phone service is compatible with TTY equipment.

For further assistance with accessibility features and products, BEK recommends contacting *North Dakota Assistive Technology* who specialize in "assistive technology" for all North Dakotans regardless of age, need, disability or impairment.
