

## **BEK Communications Location Surveys – Happening Now**

In 2019, BEK Communications adopted Alternative Connect America (ACAM) funding assistance from the FCC, allowing us to continue growing and offering our nationally acclaimed internet, television and phone services to more rural North Dakotans.

ACAM Funding brings reporting obligations. This includes submitting “geolocated broadband deployment data showing where they (BEK) have built out broadband by latitude and longitude.”

In short, it means BEK is required to record the geo-location of every structure in our service areas along with a structure photograph. Holly Beck Surveying will be in your area shortly, conducting these “surveys.”

Thank you for your understanding and cooperation as we work to gather this data.

If you have any questions or concerns, please contact us at 701.475.2361 or [bekcomm@bektel.com](mailto:bekcomm@bektel.com)
